THE AUDIO CHAIN IS COMPLETE.

SHURE

MICROFLEX™ MXN5W-C NETWORKED LOUDSPEAKER

The Microflex™ MXN5 Networked Ceiling Loudspeaker provides high-quality speech reproduction for AV Conferencing applications. Gone is the need for a separate amplifier, the PoE-powered MXN5 is the ideal loudspeaker solution when used as part of a Shure networked conferencing audio system. Combined with Microflex® Advance™ Array Microphones and IntelliMix® DSP, the full Shure networked systems ecosystem delivers premium audio performance with unmatched ease of deployment, with the added confidence of Shure Audio Encryption and Dante Domain Manager compatibility.

+ GREAT COVERAGE

Adjustable audio deployment via software to ensure ideal audio coverage in any conference environment.

+ AUDIO PERFORMANCE

Pre-tuned frequency response optimized for voice intelligibility in AV conferencing applications.

+ CONSISTENT CLARITY

High quality speech reproduction.

+ AESTHETIC DESIGN

Aesthetic design subtly blends into drop ceiling environments. Removable magnetic and paintable grille seamlessly covers the entire speaker.

+ WHY NETWORKED

Deployed and controlled via software, this networked loudspeaker does not require a separate amplifier.

Designed for AV Conferencing in corporate meeting environments, MXN5 is an ideal solution for the Shure conferencing ecosystem. Along with the market-leading MXA910 Ceiling Array Microphone and newly launched IntelliMix Room DSP, audio conferencing never sounded so good.
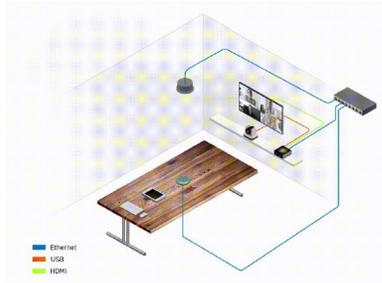

SMALL ROOM
